## CHOOSE LENOVO THINKSERVER – ENTERPRISE-CLASS. OUTSTANDING VALUE.

From growing small businesses to enterprise workloads, Lenovo ThinkServer tower servers meet your business-critical demands with legendary THINK quality and reliability, while maximizing your budget.

## GET MORE OUT OF YOUR THINKSERVER SYSTEMS

As your business needs grow, you need IT that can grow with you — without straining your budget or increasing complexity. Cost-effective ThinkServer options give you added performance and functionality and are easy to install and configure so you can be up and running quickly and stay that way. Why should you buy ThinkServer-branded options?

- **Compatibility** – ThinkServer options and upgrades are thoroughly tested for compatibility for easy integration into your system. We don't mean just plugging the option in and powering on the system. We test ThinkServer options in multiple configurations to make sure we have full compatibility across the line.
- **Reliability** – Because reliability is key, we strive for flawless implementation so your server starts quickly and stays up and running. At Lenovo, we have high expectations from our suppliers. All ThinkServer options must meet stringent quality standards for reliability in enterprise environments. We source the best materials available and ensure they are living up to Lenovo standards.
- **Serviceability** – ThinkServer options inherit the base system warranty of the server to which they are installed – including 4-hour service upgrades. If your server is critical enough to your business to upgrade the warranty, the only way to ensure that availability is to choose ThinkServer options.
- **Optimization** – We turn the results from our rigorous quality testing into action and optimize many options to deliver the best ThinkServer performance possible.

# BOOST YOUR PERFORMANCE

## Processors and Memory

When you want to increase ThinkServer performance for database processing, virtualization and line-of-business applications among others, consider adding a second processor or expanding memory. ThinkServer tower servers are powered by the latest-generation Intel® Xeon® processor technology, providing world-class performance and compute power. Lenovo-branded, low-voltage memory offers higher performance and more bandwidth over previous-generation technology, while reducing power consumption.

# STEP UP YOUR INTERNAL STORAGE

## Hard-disk Drives and Solid-state Drives

Your data is likely your most important asset. For storage, you need no-compromises performance and high reliability. For ThinkServer, Lenovo offers a choice of the industry's most trusted SATA or SAS hard-disk drives as well as blazing-fast solid-state drives in various capacities that are tested for durability. Easy to install, ThinkServer drives are designed with ergonomic cradles that also make maintenance a snap. No matter your business needs, ThinkServer storage options deliver the performance, reliability and capacity you demand. Wondering which drive type you should use? Consider this.

- SATA hard-disk drives offer an unbeatable combination of high scalability and budget-friendly prices.
- SAS hard-disk drives are typically only used in servers. They have better error-correcting capabilities than SATA hard-disk drives and are generally two-to-three times faster.
- Solid-state drives contain no moving parts making them more reliable than SATA or SAS hard-disk drives and much faster. Choose solid-state drives when the absolute highest performance and reliability are non-negotiable.

## RAID

Keeping data online 24/7 and preventing data loss requires smart solutions. Ensure your critical data is protected and available without sacrificing on performance using ThinkServer RAID solutions. Lenovo offers a variety of ThinkServer software RAID upgrades and hardware RAID controllers from LSI® – the most widely deployed RAID data-protection architecture in the industry.

Our range of ThinkServer RAID controllers addresses virtually all direct-attached storage environments – SATA or SAS hard-disk drives or solid-state drives, server-based storage or external direct-attached JBOD and storage enclosures. Options such as write-back cache with battery backup on the ThinkServer RAID 700 controller take availability to the next level and provide additional peace of mind. CacheCade Pro 2.0/FastPath, an option on the ThinkServer RAID 710 controller, is designed to improve the performance of your existing ThinkServer drive volumes, by utilizing solid-state drive technology as a secondary tier of cache to maximize random read-and-write performance.

# CONNECT YOUR SERVER

Ethernet adapters, converged network adapters (CNA) and host bus adapters (HBA) help you leverage the full bandwidth potential of your network and scale your I/O to meet your growing infrastructure needs. Lenovo is working with industry-leading technology partners such as Intel, QLogic® and Emulex® to deliver a wide array of robust, fast and reliable Ethernet, CNA and HBA adapter choices for ThinkServer. And remember, as with all ThinkServer-branded options, ThinkServer Ethernet CNAs and HBAs are tested and proven on our tower servers.

## Ethernet

Choose among dual- and quad-port ThinkServer Ethernet adapters by Intel with speeds of up to 10Gbps. Enjoy the cost savings and convenience of cross-platform compatibility on many ThinkServer series.

# MANAGE WITH EASE

## ThinkServer Management Module Premium

The ThinkServer Management Module Premium (TMMp) adds to the functionality of the ThinkServer Management Module (TMM) – which is standard on ThinkServer TD340 tower – giving you remote keyboard, video, mouse (KVM) access and remote media access to your server. This means you can easily manage your servers from another location.

Part Number	Option	TD340	RD340	RD440	RD540	RD640

# PROTECT, MANAGE AND SHARE YOUR CRITICAL DATA

The Lenovo family of network and direct-attached storage devices offer simple, powerful and affordable solutions to protect, manage and share your critical information. They include large storage capacities and the enterprise-class features that organizations need, such as support for hot-swap drives, RAID, Active Directory, iSCSI, virtualization, snapshots and cloud storage options.

## Network Attached Storage

### Tower Devices

The LenovoEMC™ px2-300d, px4-400d and px6-300d network-attached devices pack ultra-fast storage and protection into a small, quiet chassis for office data protection and backup, with local and remote file sharing. Powered by enterprise-class LenovoEMC storage technology – and offering up to 24TB of capacity – the px tower devices are ideal for small- to medium-sized businesses and remote office/branch offices. Business users will appreciate the advanced data-protection features, such as multiple RAID levels with hot-swap drives, user quotas, device-to-device data replication and certification for most virtualization environments. High-performance video surveillance/storage management solutions are also available with these tower devices to help protect small offices.

70CM9001NA	LenovoEMC px4-400d Server-Class 8TB (4HD x 2TB)
70CM9002NA	LenovoEMC px4-400d Server-Class 12TB (4HD x 3TB)
70CM9003NA	LenovoEMC px4-400d Server-Class 16TB (4HD x 4TB)
px6-300d	
70BG9000NA	LenovoEMC px6-300d Network Storage, 0TB Diskless
70BG9009NA	LenovoEMC px6-300d Network Storage Server-Class 6TB (6HD x 1TB)
70BG9011NA	LenovoEMC px6-300d Network Storage Server-Class 12TB (6HD x 2TB)
70BG9007NA	LenovoEMC px6-300d Network Storage Server-Class 18TB (6HD x 3TB)
70BG9012NA	LenovoEMC px6-300d Network Storage Server-Class 24TB (6HD x 4TB)

## Rackmount Devices

The powerful LenovoEMC px4-400r, px4-300r, px12-400r and px12-450r network storage arrays offer the highest levels of performance and advanced data protection for small- to medium-sized businesses and distributed enterprises. These rackmount arrays are available in configurations up to 48TB in a single array and are ideal for production data stores, server virtualization, backup-to-disk target and video surveillance. Features include device-to-device data replication, snapshots, SSD cache pools RAID support, Windows® Active Directory support, Active Directory High Availability, Hybrid Authentication, remote access and management and user quotas.

## Direct-Attached Storage

Combining expansive direct-storage capacity and innovative modularity, the ThinkServer SA120\* provides an innovative tiered storage solution for data center deployments, distributed enterprises or small businesses. Its dual I/O controllers couple the high-speed, low-latency performance of solid-state drives with cost-effective, large-capacity SAS – for a budget-friendly storage solution with outstanding performance. The SA120 provides plenty of room for growth. You have the capability to add up to 12 x 3.5" SAS hard-disk drives on the front panel, up to 4 x 2.5" SATA solid-state drives on the rear panel and can cascade up to eight SA120 enclosures with HBA support. With a standard 3-year warranty and tool-less features, the SA120 provides peace of mind at an impressive value.

Part Number	Name
